

Rural Housing Week Case studies from Karbon Homes

Mariner's View, Amble, Northumberland

Karbon Homes built 10 two bedroom bungalows in Amble for sale through shared ownership. The homes have a distinctive look, designed by Chris Brummit architects. The site was acquired from local contractors NB Clarke based in Morpeth and built in June 2019.

The development costs were £1.2m and capital funding was provided by Homes England. The scheme was been very popular and all the bungalows have been sold.

The properties are situated to the north of Amble which is a harbour town on the Northumberland coast, close to local services including market towns such as Morpeth and Alnwick.
